PROFESSIONAL SUMMARY

Software Engineering graduate specialized in full-stack development using Spring Boot and Angular. Experienced in building microservices architectures and integrating DevOps practices. Passionate about scalable systems and problem solving, with strong teamwork experience gained through professional volleyball competition.

EDUCATION & CERTIFICATIONS

- **Engineering Degree in Software Engineering** *SESAME University* 2022-2025
- **Integrated Preparatory Cycle in Computer Science** *SESAME University* 2020-2022
- **Computer Science Baccalaureate** *Abed Aziz Khouja High School* 2019-2020
- **IT Specialist – Databases (Certiport)** March 2024

PROFESSIONAL EXPERIENCE

Club Olympique de Kelibia *Freelance Full-Stack Developer* October 2026

· Volleyball Academy Management Platform (COK Academy and COK Academy Elite).

Designed and built a web application to manage volleyball academies: player records, QR-code membership cards, attendance tracking by camera QR scan, payments with numbered PDF receipts, reports, and role-based accounts.

Angular 22 / Angular Material, Spring Boot 4 (Java 21), PostgreSQL, Docker Compose, Caddy (automatic HTTPS with Let's Encrypt).

- Deployed to production on an Ubuntu VPS for two academies from a single codebase (white-label branding, separate databases), including custom domains, daily database backups, fail2ban, SSH key authentication, and SMTP email delivery.

Club Olympique de Kelibia *Software Engineering Intern* April 2025 – September 2025

· Developed an intelligent platform for volleyball team management.

Designed a microservices-based backend architecture, developed a modern and interactive frontend application, and integrated an AI chatbot using the Gemini API to answer questions about players, schedules and training sessions.

Spring Boot, Angular, MySQL, Docker, Git, Jenkins,Kubernetes

- Centralized all team data into a unified platform, reduced administrative management time by 60% and improved training planning and organizational efficiency.

Arab Tunisian Bank (ATB) *Software Developer Intern* June 2024 – August 2024

· Developed a web platform for trainee management

Built a web platform enabling full trainee management within the bank, including requirements analysis, UML design, and implementation of CRUD functionalities.

PHP, MySQL, XAMPP, HTML/CSS, JavaScript

- Digitalized the trainee management process, significantly reduced processing time through automation and improved internal data visibility and traceability.

Tunisie Telecom *Software Developer Intern* June 2023 – July 2023

· Developed a desktop application for trainee management.

Designed and implemented a desktop application for managing trainees, including requirement specification, UML modeling and CRUD system development.

Java, NetBeans, MySQL, WampServer

- Centralized trainee data and digitalized internal workflows, reduced operational processing time through automation and enhanced monitoring and information traceability.

TECHNICAL SKILLS

- **Backend :** Java, Spring Boot, REST APIs, Microservices, MySQL, PostgreSQL
- **Frontend :** Angular, HTML, CSS, JavaScript
- **DevOps :** Docker Compose, Jenkins, Git, Kubernetes, Linux/Ubuntu, Caddy/Nginx
- **Programming :** C, C++, Python
