## PROFESSIONAL SUMMARY

Software Engineering graduate specialized in full-stack development using Spring Boot, Angular ... Experienced in building microservices architectures and integrating DevOps practices (Docker, Jenkins). Passionate about scalable systems and problem solving, with strong teamwork experience gained through professional volleyball competition.

## EDUCATION & CERTIFICATIONS

- **Engineering Degree in Software Engineering** *SESAME University* 2022-2025
- **Integrated Preparatory Cycle in Computer Science** *SESAME University* 2020-2022
- **Computer Science Baccalaureate** *Abed Aziz Khouja High School* 2019-2020
- **Database Certification** *IT Specialists* March 2024

## PROFESSIONAL EXPERIENCE

**Club Olympique de Kelibia** *Software Engineering Intern – Final Year Project (PFE)* April 2025 – September 2025

· **Developed an intelligent platform for volleyball team management.**

**Technologies:** Spring Boot, Angular, MySQL, Docker, Git, Jenkins

**Description:** Designed a microservices-based backend architecture, developed a modern and interactive frontend application, and integrated an intelligent chatbot to support team operations.

**Key Achievements:**

- Centralized all team data into a unified platform.
- Reduced administrative management time by G0%.
- Improved training planning and organizational efficiency.

---

**Arab Tunisian Bank (ATB)** *Software Developer Intern — Arab Tunisian Bank* June 2024 – August 2024

· **Developed a trainee management platform.**

**Technologies :** PHP, MYSQL, XAMPP, HTML/CSS, JavaScript

**Description:** Built a web platform enabling full trainee management within the bank, including requirements analysis, UML design, and implementation of CRUD functionalities.

**Key Achievements:**

- Digitalized the trainee management process.
- Significantly reduced processing time through automation.
- Improved internal data visibility and traceability.

---

**Tunisie Telecom** *Software Developer Intern — Tunisie Telecom* June 2023 – July 2023

· **Developed a desktop application for trainee management.**

**Technologies:** Java, NetBeans, MySQL, WampServer

**Description:** Designed and implemented a desktop application for managing trainees, including requirement specification, UML modeling, and CRUD system development.

**Key Achievements:**

- Centralized trainee data and digitalized internal workflows.
- Reduced operational processing time through automation.
- Enhanced monitoring and information traceability.

## TECHNICAL SKILLS

- **Backend:** Java, Spring Boot, REST APIS, Microservices, MySQL
- **Frontend:** Angular, HTML, CSS, JavaScript
- **DevOps:** Docker, Jenkins, Git, Kubernetes
- **Programming:** C, C++, Python
